java-standalone - 1.6

version :3.3.1.16002-SNAPSHOT

A standalone application is one that can be executed independently and would execute and produce some output either as a UI or on the JVM console. Any java class with a main method can be considered a mini standalone java application.

EXTERNALMODULE

aether-spi
 The service provider interface for repository system implementations and repository connectors.

Activeio-core
A high performance IO abstraction framework

Activemq-core
The ActiveMQ Message Broker and Client implementations

gson
Gson is a Java library that can be used to convert Java Objects into their JSON representation. It can also be used to convert a JSON string to an equivalent Java object. Gson can work with arbitrary Java objects including pre-existing objects that you do not have source-code of. Gson support java generics and doesn't require any special annotations.
